**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This application has been examined. The claims 13-26 are pending. The examination results are as following.

#### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 13-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,690,341. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current Application 10/690,836 and Patent No. 6,690,341 recite the same limitations: "a method of displaying a high density bit mapped image on low-density dot-matrix display device; light emitting elements being arranged by removing parts of rows and columns; allocating a plurality of dots of said image data to be displayed at said light element and between said light emitting elements to each light element as one group; selecting repetitively respective dots of said image data dot a thigh speed from a plurality of dot; a probability of selecting each dot of said image data of one group under said selection order rule is constant". However, the different between the current Applicant 10/690,836 and Patent No. 6,690,341 that, the current Application

Art Unit: 2677

10/690,836 does not teach “each distance between the adjacent light emitting elements is set at least twice the distance of adjacent dots in said bit-mapped image”, and “ a main control device comprising a memory storing computer executable codes to cause said main control device”.

It obvious to one of ordinary skilled in the art at the time the invention was made to have “each distance between the adjacent light emitting elements is set at least twice the distance of adjacent dots in said bit-mapped image”, and “ a main control device comprising a memory storing computer executable codes to cause said main control device” because distance between the adjacent light emitting elements is set at least twice the distance of adjacent dots in said bit-mapped image is depend on the selecting of the designer, and the display device system will operate when it has “a memory storing computer executable codes to the main control device”.
